**Abstract of FR2606990**

Present dishwashers are too large for small families and soon form mould and evil smells. The new min-dishwasher is made of semi-foam transparent polypropylene in one piece with the dimension of 540 mm width x 530 mm depth x 500 mm height. The main chamber (1) has a fold-down door (2). The front panel (3) is for the switches (4) and control unit (5); the space behind it encloses the pump, the motor and heater. The flap (2) can be made of polymethacrylics.
